

Ex9S80 (14A-80A)

Ex9S80 Manual Motor Starter

Manual Self-Protected Combination Motor Controller

NOARK

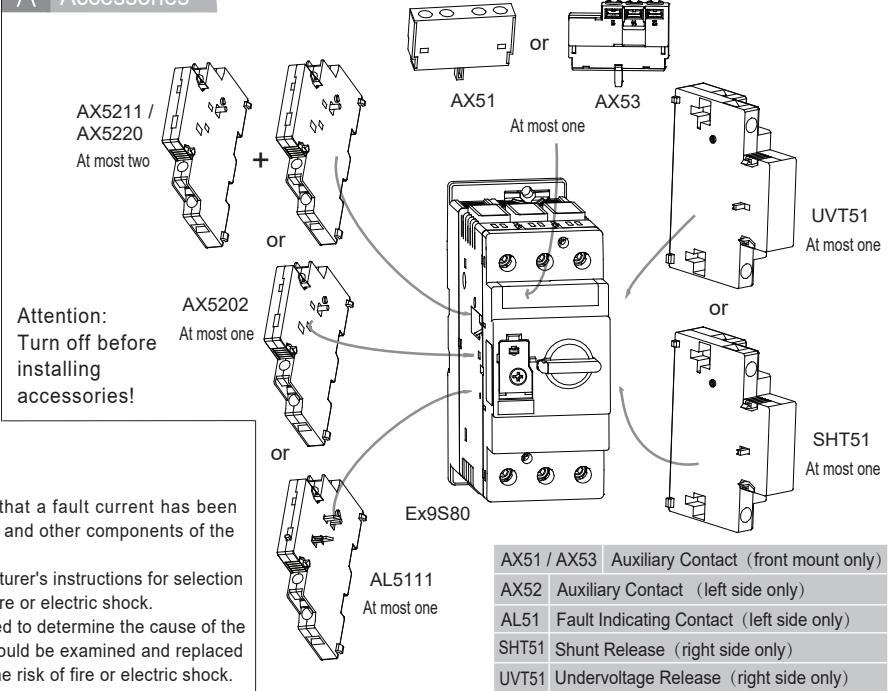

WARNING

The opening of the branch-circuit protective device may be an indication that a fault current has been interrupted. To reduce the risk of fire or electric shock, current-carrying parts and other components of the controller shall be examined and replaced if damaged.

To maintain overcurrent, short-circuit, and ground-fault protection, the manufacturer's instructions for selection of overload and short-circuit protection must be followed to reduce the risk of fire or electric shock.

When an overload or a fault current interruption occurs, circuits must be checked to determine the cause of the interruption. When a fault condition exists, the current-carrying components should be examined and replaced when damaged, and the integral current sensors must be replaced to reduce the risk of fire or electric shock.

A Accessories

AX51 / AX53	Auxiliary Contact (front mount only)
AX52	Auxiliary Contact (left side only)
AL51	Fault Indicating Contact (left side only)
SHT51	Shunt Release (right side only)
UVT51	Undervoltage Release (right side only)

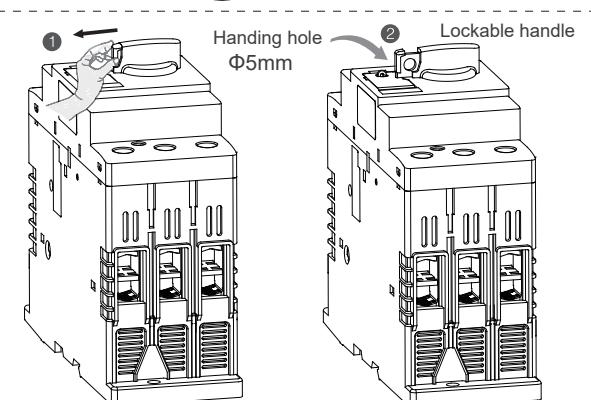

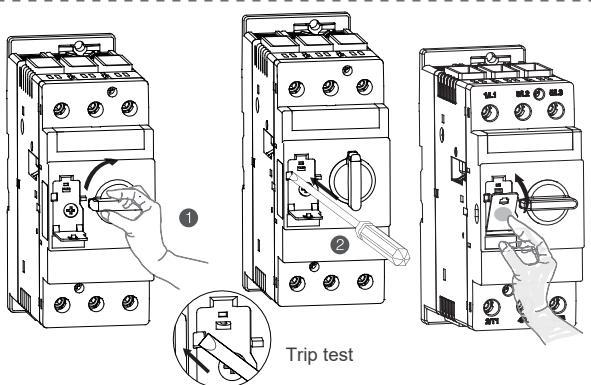

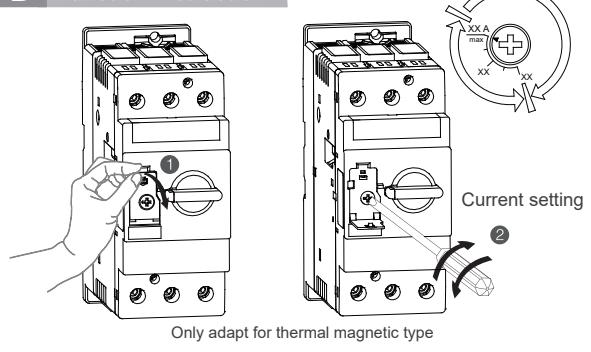

AVERTISSEMENT

Le déclenchement du dispositif de protection de la dérivation peut signifier qu'un courant de fuite a été interrompu. Pour réduire les risques d'incendie et de choc électrique, les pièces porteuses de courant et autres pièces de la commande doivent être examinées et remplacées au besoin.

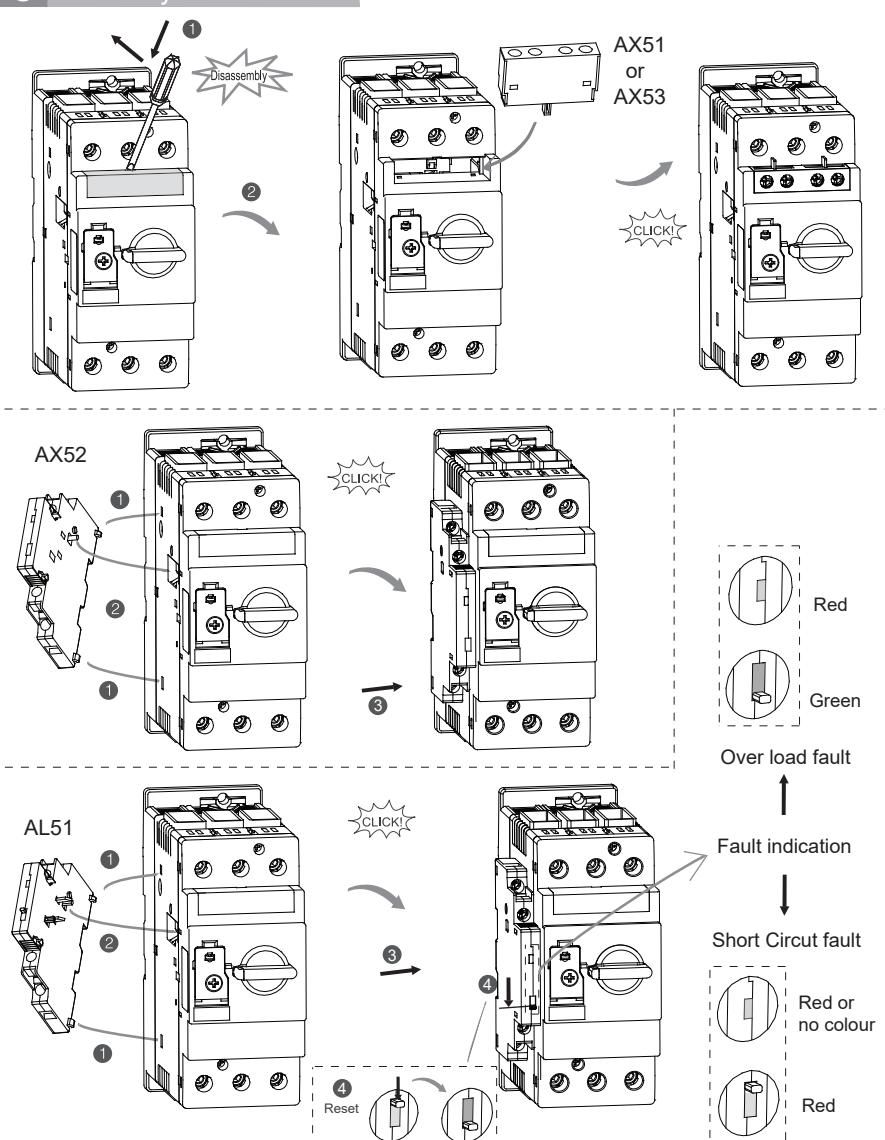

Pour assurer une protection continue contre les surintensités, les courts-circuits et les fuites à la terre, les instructions du fabricant relatives à la sélection d'une protection contre la surcharge et les courts-circuits doivent être respectées afin de réduire le risque d'incendie et ou de choc électrique.

En cas d'intervention due à une surcharge ou un courant de défaut, les circuits doivent être vérifiés pour déterminer la cause de l'interruption. En condition de défaut, les composants porteurs de courant devraient être examinés et remplacés au besoin, et les capteurs de courant intégrés doivent être remplacés afin de réduire le risqué d'incendie et ou de choc électrique.

D Assembly Accessories

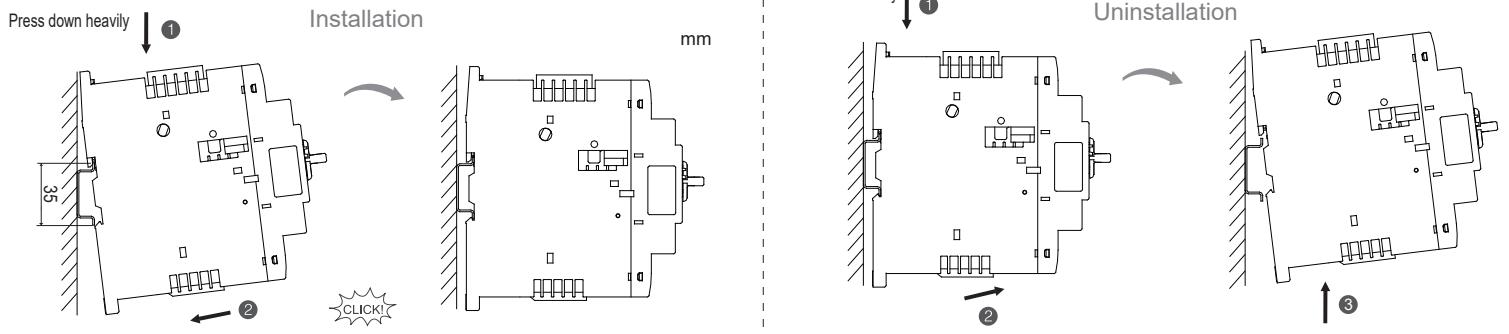

Attention for installing UVT51:
Ex9S80 should not be closed in step ④, otherwise please reinstall UVT51.

Attention for using SHT51:
The inching signal which controls SHT51 should less than 8 seconds.

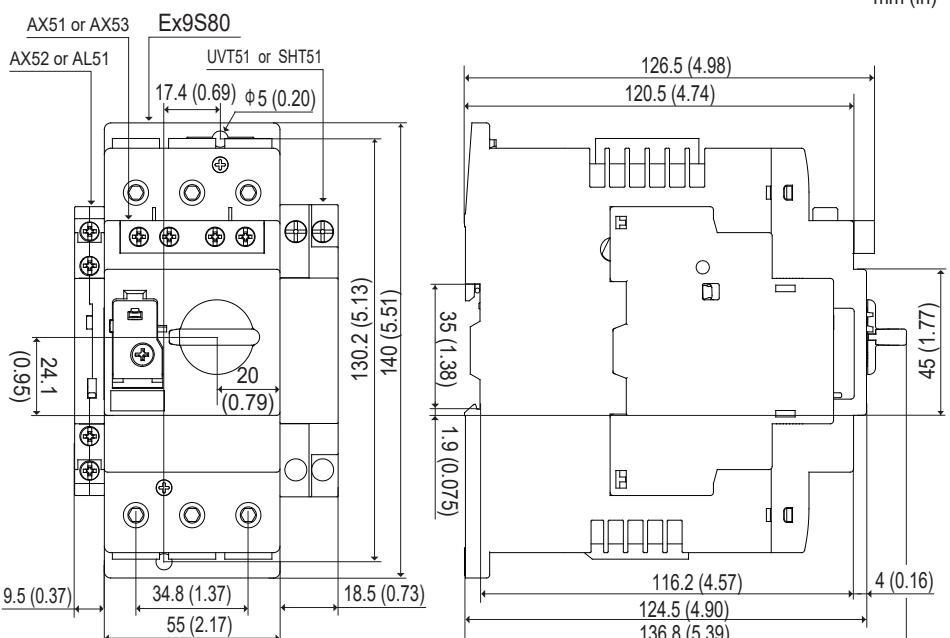

E Angle of Installation

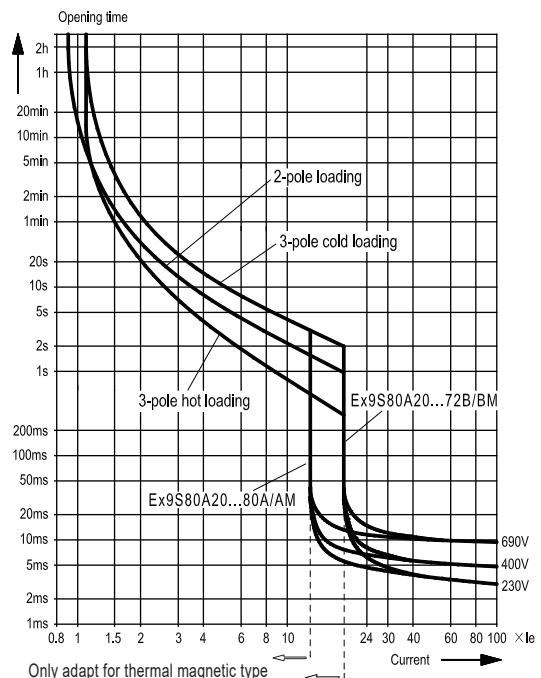

F Installation and Uninstallation
